Improving the Quality of Care in Nursing Homes May 08 2021 As more people live longer, the need for quality long-term care for the elderly will increase dramatically. This volume examines the current system of nursing home regulations, and proposes an overhaul to better provide for those confined to such facilities. It determines the need for regulations, and concludes that the present regulatory system is inadequate, stating that what is needed is not more regulation, but better regulation. This long-anticipated study provides a wealth of useful background information, in-depth study, and discussion for nursing home administrators, students, and teachers in the health care field; professionals involved in caring for the elderly; and geriatric specialists.

Criterial and Standards for Home Health Care in Southeastern Michigan Jul 10 2021

Pocket Guide to Home Care Standards Jun 20 2022 An essential reference for every home care nurse, this book provides comprehensive, practical information on standards of patient care, quality requirements, and documentation criteria for reimbursement. Important patient care goals and skilled interventions for other home care team members (home health aides, medical social service workers, occupational therapists, physical therapists, speech-language therapists, dietitians, pharmacists). Provides a detailed overview of home care, and hundreds of patient care entries on various disorders and treatments.

InterRAI Home Care (HC) Assessment Form and User's Manual Jun 28 2020 The interRAI HC Assessment System has been designed to be a user-friendly, reliable, person-centered system that informs and guides comprehensive planning of care and services for elderly and disabled persons in community-based settings around the world. It focuses on the person's functioning and quality of life by assessing needs, strengths, and preferences. It also facilitates referrals when appropriate. When used on multiple occasions, it provides the basis for an outcome-based assessment of the person's response to care or services. The interRAI HC Assessment System can be used to assess persons with chronic needs for care, as well as with post-acute care needs (e.g., after hospitalization or in a hospital-at-home situation).

Home Health Nursing Jul 30 2020 This unique, spiral-bound handbook is compact, portable, and written with busy home health nurses in mind! Organized by body system, it offers instant advice on assessment and care planning for the disorders home health nurses are likely to encounter. Providing assessment guides for all body systems, the home environment, and the client's psychological status, it includes full care plans for over 50 illnesses and conditions most commonly encountered in the home. Each plan lists nursing diagnoses, short- and long-term expected outcomes, nursing interventions, and client caregiver interventions. Care plans are organized by body systems to allow for quick retrieval of information. Both short-term and long-term outcomes are included in the care plans to aid evaluation of the care provided. Detailed assessment guidelines are provided for all body systems to facilitate complete and comprehensive client examinations. Guidelines for environmental and safety assessments aid in the appraisal and improvement of clients' living conditions. Client and caregiver interventions are outlined in the care plans to promote active client participation in self-care. The convenient pocket size makes transportation and use convenient to home health nurses. Appendices on documentation guidelines, laboratory values, medication administration, home care resources, and standard precautions provide quick access to useful home care information. Related OASIS items are identified in the assessment section, and ICD-9 diagnostic codes in the care plans section assist with proper home care documentation. Visit frequency and duration schedules are suggested within each care plan to assist nurses in evaluating and planning care. NANDA nursing diagnoses are consistent with the latest 2001-2002 nomenclature. An increase in suggested therapy referrals within the care plans and in a new appendix helps nurses identify indicators for specialized services. A fully updated Resources Appendix includes websites for easy access to home health service information.

Improving the Quality of Long-Term Care Dec 15 2021 Among the issues confronting America is long-term care for frail, older persons and others with chronic conditions and functional limitations that limit their ability to care for themselves. Improving the Quality of Long-Term Care takes a comprehensive look at the quality of care and quality of life in long-term care, including nursing homes, home health agencies, residential care facilities, family members and a variety of others. This book describes the current state of long-term care, identifying problem areas and offering recommendations for federal and state policymakers. Who uses long-term care? How have the characteristics of this population changed over time? What paths do people follow in long term care? The committee provides the latest information on these and other key questions. This book explores strengths and limitations of available data and research literature especially for settings other than nursing homes, on methods to measure, oversee, and improve the quality of long-term care. The committee makes recommendations on setting and enforcing standards of care, strengthening the caregiving workforce, reimbursement issues, and expanding the knowledge base to guide organizational and individual caregivers in improving the quality of care.

Home Care Nursing: Surviving in an Ever-Changing Care Environment Jan 04 2021 Tina M. Marrelli's new book, Home Care Nursing: Surviving in an Ever-Changing Care Environment is a practical and comprehensive guidebook written concisely and without jargon or insider acronyms, making the book

accessible to anyone whose work is connected to home care nursing services. Designed to provide chapters as stand-alone resources for readers with previous experience seeking updated guidance, Home Care Nursing is also an excellent guide for course or orientation material. Each chapter is packed with practical questions, discussion topics, and additional resources, such as a complete Medicare Benefit Policy for reference. Additionally, offering more than just an overview of the healthcare and home care markets, this book discusses the unique practice setting and environment of home care nursing, the laws regulations, and quality, and how to make the leap into the field, document your home visit, and improve your professional growth and development.

Handbook of Home Health Standards E-Book Mar 30 2023 Handbook of Home Health Standards: Quality, Documentation, and Reimbursement includes everything the home care nurse needs to provide quality care and effectively document care based on accepted professional standards. This handbook offers detailed standards and documentation guidelines including ICD-9-CM (diagnostic) codes, OASIS considerations, service skills (including the skills of the multidisciplinary health care team), factors justifying homebound status, interdisciplinary goals and outcomes, reimbursement, and resources for practice and education. The fifth edition of this "little red book has been updated to include new information from the most recently revised Federal Register Final Rule and up-to-date coding. All information in this handbook has been thoroughly reviewed, revised, and updated. Offers easy-to-access and easy-to-read format that guides users step by step through important home care standards and documentation guidelines Provides practical tips for effective documentation of diagnoses/clinical conditions commonly treated in the home, designed to positively influence reimbursement from third party payors. Lists ICD-9-CM diagnostic codes, needed for completing CMS billing forms, in each body system section, along with a complete alphabetical list of all codes included in the book in an appendix. Incorporates hospice care and documentation standards so providers can create effective hospice documentation. Emphasizes the provision of quality care by providing guidelines based on the most current approved standards of care. Includes the most current NANDA-approved nursing diagnoses so that providers have the most accurate and up-to-date information at their fingertips. Identifies skilled services, including services appropriate for the multidisciplinary team to perform. Offers discharge planning solutions to address specific concerns so providers can easily identify the plan of discharge that most effectively meets the patient's needs. Lists the crucial parts of all standards that specific members of the multidisciplinary team (e.g., the nurse, social worker) must uphold to work effectively together to achieve optimum patient outcomes. Resources for care and practice direct providers to useful sources to improve patient care and/or enhance their professional practice. Each set of guidelines includes patient, family, and caregiver education so that health care providers can supply clients with necessary information for specific problems or concerns. Communication tips identify quantifiable data that assists in providing insurance case managers with information on which to make effective patient care decisions. Several useful sections make the handbook thorough and complete: medicare guidelines; home care definitions, roles, and abbreviations; NANDA-approved nursing diagnoses; guidelines for home medical equipment and supplies. Small size for convenient carrying in bag or pocket! Provides the most up-to-date information about the newest and predominant reimbursement mechanisms in home care: the Prospective Payment System (PPS) and Pay For Performance (P4P). Updated terminology, definitions, and language to reflect the federal agency change from Health Care Financing Administration (HCFA) to Centers for Medicare & Medicaid Services (CMS) and other industry changes. Includes the most recent NANDA diagnoses and OASIS form and documentation explanations. New interdisciplinary roles have been added, such as respiratory therapist and nutritionist./LI>

2009 Standards for Home Health, Personal Care, and Support Services Feb 23 2020 Helps you to enhance understanding of accreditation requirements and streamlines compliance preparation efforts by including those home care standards that apply to home health, and personal care and support services.
