*Prioritization, Delegation, and Assignment: Practice Exercises for the NCLEX® Examination* is the only review book on the market with a focus on prioritization and management of care—just like the current NCLEX Examination itself! The workbook's unique approach

establishes your foundational knowledge and then provides exercises of increasing difficulty to help you build confidence in your prioritization, delegation, and patient assignment skills. It offers unique preparation for the NCLEX Examination and effectively equips you to practice in today's fast-paced healthcare environment.

**UNIQUE! Emphasis on the NCLEX Management-of-Care Focus:** LaCharity is the only workbook available that focuses on the NCLEX Exam's management-of-care focus. No other book on the market addresses the heavy management-of-care emphasis - consisting of prioritization, delegation, and patient assignment - of the current NCLEX Examination (17-23% of the 2013 NCLEX-RN Exam). Graduating seniors report that LaCharity has been invaluable in preparing them to pass the NCLEX Exam and enter into practice.

**UNIQUE! Three-Part Organization:** The book consists of three parts, each of which builds on the previous one: .

**Part 1: Introduction; Part 2: Prioritization, Delegation, and Assignment in Common Health Scenarios; Part 3: Prioritization, Delegation, and Assignment in Complex Health Scenarios.** This organization establishes foundational knowledge and then provides exercises of increasing difficulty to help students build confidence in their prioritization, delegation, and patient assignment skills. It also helps students move from passing the NCLEX-RN Exam to "hitting the ground running" as they transition into clinical practice.

**Part 1: Introduction:** Part 1, consisting of a chapter by delegation expert Ruth Hansten, provides guidelines for prioritization, delegation, and patient assignment decisions. The Introduction provides a concise, practical foundation on which Parts 2 and 3 build.

**Part 2: Prioritization, Delegation, and Assignment in Common Health Scenarios:** Organized by body system, the chapters in Part 2 begin to give students practice in applying the principles from Part 1 to relatively straightforward scenarios involving single patients or simple patient

assignments. Straightforward NCLEX-style multiple-choice, multiple-select, ordering, and short-answer questions help students develop and build confidence in prioritization, delegation, and patient assignment skills while working within the confines of relatively simple health scenarios. Part 3: Prioritization, Delegation, and Assignment in Complex Health Scenarios: Unfolding cases in Part 3 gradually immerse students in realistically complex clinical situations involving patients with complicated health problems or challenging assignment issues. These unfolding cases build on the skills learned in Part 2 to equip students to make sound decisions in realistic, complex health scenarios involving complicated health problems and/or challenging patient assignment decisions. The "unfolding" nature of each case realistically demonstrates the progression of typical health scenarios and helps students learn to "think like nurses" by developing what Benner (2010) calls "clinical imagination." Answer Key: The in-depth Answer Key at the back of the book provides not only the correct answer but also a detailed rationale and an indication of the focus of the question, whether prioritization, delegation, supervision, or patient assignment. Detailed rationales encourage formative assessment, in which students learn as much from answering incorrectly as they do from answering correctly. Expanded content focus to include psychiatric/mental health, OB/maternity, and pediatrics along with med-surg areas New chapters on infection control and obstetrics Develop your management and leadership skills. Leadership and Nursing Care Management, 6th Edition maintains its AONE competencies, and features the most up-to-date, evidence-based blend of practice and theory related to the issues that impact nursing management and leadership today. A fresh, conversational writing style provides you with an easy-to-understand, in-depth look at these prevalent issues.

Key topics include the nursing professional's role in law and ethics, staffing and scheduling, delegation, cultural considerations, care management, human resources, outcomes management, safe work environments, preventing employee injury, and time and stress management. UNIQUE! Chapters divided according to AONE competencies for nurse leaders, managers, and executives. Research Notes in each chapter summarize relevant nursing leadership and management studies and highlight the practical applications of research findings. Case Studies at the end of each chapter present real-world leadership and management situations and illustrate how key concepts can be applied to actual practice. Critical Thinking Questions at the end of each chapter present clinical situations followed by critical thinking questions that allow you to reflect on chapter content, critically analyze the information, and apply it to the situation. Full-color design and photos makes content more vivid. Updated! Chapter on the Prevention of Workplace Violence emphasizes the AONE, Joint Commission's, and OSHA's leadership regarding ethical issues with disruptive behaviors of incivility, bullying, and other workplace violence. Updated! Chapter on Workplace Diversity includes the latest information on how hospitals and other healthcare facilities address and enhance awareness of diversity. Updated! Chapter on Data Management and Clinical Informatics covers how new technology helps patients be informed, connected, and activated through social networks; and how care providers access information through mobile devices, data dashboards, and virtual learning systems. ANA's Principles for Delegation by Registered Nurses to Unlicensed Assistive Personnel (UAP) is designed to provide overarching principles and relevant strategies for practice in situations where registered nurses (RNs) delegate tasks to unlicensed assistive personnel (UAP). Do you know what work you can, or should, delegate? What tasks can you assign to patient care assistants (PCA), or to unlicensed assistive personnel (UAP)? Can licensed practical nurses (LPNs) and licensed vocational nurses (LVNs) delegate responsibilities? Since the final professional decision to proceed with delegation to UAPs ultimately rests with the RN, you need to be vigilant and understand the proper delegation process. Delegation and You, the latest YOU! series publication, provides an explanation of principles and relevant strategies for practice in situations in which RNs delegate tasks to UAPs. Written by two experienced nurses who served as educators, mentors and preceptors in many practice settings, this is a handy guide to the essentials of delegation and related decision-making. It includes the following: - The six criteria that every nurse must consider before delegating - An easy-to-follow illustrated example of "A Decision Tree for - Delegation" just for nurses - The 11 essential principles of delegation - A criteria-based process model of critical thinking skills to assist with delegation decisions - The key barriers to delegation and how to overcome them Delegation and You is for all clinical nurses, nurse managers and other RNs who lead care teams and delegate activities or tasks. This 11th Edition of Timby and Smith's popular text equips LPN/LVN students with the practical knowledge and skills necessary to provide safe and effective nursing care to today's medical-surgical clients. It is the position of the National Association of School Nurses (NASN) that the delegation of nursing tasks in the school setting can be a valuable tool for the school nurse, when based on the nursing definition of delegation and in compliance with state nursing regulations and guidance. Delegation in school nursing is a complex process in which the authority to perform a selected nursing task is transferred to a competent unlicensed individual (UAP) in a specific situation. The decision to delegate and the supervision of delegation of nursing tasks in the school setting rest solely with the registered nurse, who makes the determination to delegate based on nursing assessment and in compliance with applicable laws and guidance provided by professional nursing associations. The safety and welfare of the individual student and the broader school community must be the central focus of all decisions regarding the delegation of nursing tasks and functions (ANA/NCBSN, 2006). Delegation is used effectively in some areas, but unsafe and illegal delegation in school settings can occur. It is important for school districts, registered nurses, health care professionals, parents and the public to understand what activities can be delegated and when delegation is

appropriate. (Contains 11 references/resources.) [For the complete report, "Position Statements, Issue Briefs, Resolutions and Consensus Statements. Revised," see ED539227.].
