Shadow Fall (Star Wars) Dec 21 2019 Alphabet Squadron's hunt for the deadliest TIE fighters in the galaxy continues in this Star Wars adventure! News of the New Republic's victory still reverberates through the galaxy. In its wake, the capital ships of the newly legitimized galactic government journey to the farthest stars, seeking out and crushing the remnants of imperial

tyranny. But some old ghosts are harder to banish than others. And none are more dangerous than Shadow Wing. Yrica Quell's ragtag Alphabet Squadron still leads the search for Shadow Wing, but they're no closer to their goal—and the pressure to find their quarry before it's too late has begun to shake them apart. Determined to finish the fight once and for all, Quell works with New Republic Intelligence's contentious Caern Adan and the legendary General Hera Syndulla to prepare the riskiest gambit of her starfighting career—a trap for Shadow Wing that could finish the chase once and for all. But in the darkness, their enemy has evolved. Soran Keize, last of the Imperial aces, has stepped into the power vacuum at the head of Shadow Wing, reinvigorating the faltering unit in their hour of need. Once adrift in the aftershocks of the war, Keize has found meaning again, leading the lost soldiers of his unit through to safety. The only thing standing in his way? The most mismatched squadron in the New Republic Navy, led by his former mentee: the traitor Yrica Quell.

The weapons used included the purpose-made and the improvised: assault charges of various shapes, sizes and characteristics, flamethrowers, grenades and bazookas. Boots on the ground: Troop Density in Contingency

Operations Feb 21 2020 This paper clearly shows the immediate relevancy of historical study to current events. One of the most common criticisms of the U.S. plan to invade Iraq in 2003 is that too few troops were used. The argument often fails to satisfy anyone for there is no standard against which to judge. A figure of 20 troops per 1000 of the local population is often mentioned as the standard, but as McGrath shows, that figure was arrived at with some questionable assumptions. By analyzing seven military operations from the last 100 years, he arrives at an average number of military forces per 1000 of the population that have been employed in what would generally be considered successful military campaigns. He also points out a variety of important factors affecting those numbers--from geography to local forces employed to supplement soldiers on the battlefield, to the use of contractors--among others.
