Globalization and Militarism Mar 04 2021 Militarism is being globalized today, not only because weapons are being traded worldwide, but because certain ideas about "femininity" and "masculinity" are being promoted and absorbed globally. Who is presumed to be the "protector"? Who is taught to be grateful to be the "protected"? Written by one of the world's leading feminist scholars, this masterful and provocative book considers how women's desires to be patriotic yet feminine and men's fears of being feminized have been exploited to globalize militarism--and thus what it will take to roll back militarization anywhere. Through explorations of how governments think so narrowly about "national security," of how postwar reconstruction efforts have marginalized women, of how ideas about feminization were used to humiliate male prisoners in Abu Ghraib, and of why "camo" has become a fashion statement, Cynthia Enloe unravels militarism's both blatant and subtle workings. Focusing her lens on the "big picture" of international politics and on the small picture of women's and men's complex everyday lives, Enloe challenges us to recognize militarism in all its forms.

Making Money with Music Apr 17 2022 "[Chertkow and Feehan] are the ideal mentors for aspiring indie musicians who want to navigate an ever-changing music industry." —Billboard Magazine You can make a living with music today. The secret is to tap multiple income streams. Making Money With Music gives you over 100 revenue streams and the knowledge on how to tap them. Whether you're a solo artist, band, DJ, EDM producer, or other musician, this book gives you strategies to generate revenue, grow your fan base, and thrive in today's technology-driven music environment. Plus, it lists hundreds of services, tools, and critical resources you need to run your business and maximize income. Making Money With Music will show you: How to tap over 100 income streams 7 business strategies you can implement immediately How to start your music business for \$0. How to register your music to collect all of the royalties you are owed worldwide. 13 ways to compete with free and build experiences to drive fan loyalty and engagement into everything you do to increase your revenue. 45 categories of places to get your music heard and videos seen so you can get discovered, grow your fanbase, generate royalties, and boost licensing opportunities. 10 methods for raising money so you can fund your music production and projects. ...and more. Written by the authors of the critically-acclaimed modern classic *The Indie Band Survival Guide* (1st & 2nd Editions), *Making Money With Music* is the third installment in *The Indie Band Survival Guide* series, and will help you build a sustainable music business no matter what kind of music you make, where you live, and whether you're a novice or professional musician. Improve your income by implementing these ideas for your music business today.

Making Appropriations for Military Construction, Family Housing, and Base Realignment and Closure for the Department of Defense for the Fiscal Year Ending September 30, 2000, and for Other Purposes Jun 07 2021

Concepts of Biology Jan 22 2020 *Concepts of Biology* is designed for the single-semester introduction to biology course for non-science majors, which for many students is their only college-level science course. As such, this course represents an important opportunity for students to develop the necessary knowledge, tools, and skills to make informed decisions as they continue with their lives. Rather than being mired down with facts and vocabulary, the typical non-science major student needs information presented in a way that is easy to read and understand. Even more importantly, the content should be meaningful. Students do much better when they understand why biology is relevant to their everyday lives. For these reasons, *Concepts of Biology* is grounded on an evolutionary basis and includes exciting features that highlight careers in the biological sciences and everyday applications of the concepts at hand. We also strive to show the interconnectedness of topics within this extremely broad discipline. In order to meet the needs of today's instructors and students, we maintain the overall organization and coverage found in most syllabi for this course. A strength of *Concepts of Biology* is that instructors can customize the book, adapting it to the approach that works best in their classroom. *Concepts of Biology* also includes an innovative art program that incorporates critical thinking and clicker questions to help students understand--and apply--key concepts.

Making Appropriations for Military Construction, Family Housing, and Base Realignment and Closure for the Department of Defense for the Fiscal Year Ending September 30, 1998, and for Other Purposes Aug 21 2022

Seriously! Aug 09 2021 In *Seriously!*, Cynthia Enloe, author of the groundbreaking analysis of globalization, *Bananas, Beaches, and Bases*, addresses two deeply gendered and contested questions: Who is taken seriously? And who gets to bestow the label "serious" on others? With a strategy of taking both women and gender dynamics seriously, Cynthia Enloe investigates the Dominique Strauss-Kahn affair and the banking crash of 2008, the subsequent recession, as well as UN peacekeeping and the ongoing Egyptian revolution. Each case study highlights the gritty experiences of women in diverse circumstances—in banks, on the job market, in war zones, and in revolutions. The results of taking women seriously are fresh insights into what fuels the cultures of hyper-risk taking, of sexual harassment, and the denial of women's post-war security.

Bananas, Beaches and Bases Apr 29 2023 In this brand new radical analysis of globalization, Cynthia Enloe examines recent events—Bangladeshi garment factory deaths, domestic workers in the Persian Gulf, Chinese global tourists, and the UN gender politics of guns—to reveal the crucial role of women in international politics today. With all new and updated chapters, Enloe describes how many women's seemingly personal strategies—in their marriages, in their housework, in their coping with ideals of beauty—are, in reality, the stuff of global politics. Enloe offers a feminist gender analysis of the global politics of both masculinities and femininities, dismantles an apparently overwhelming world system, and reveals that system to be much more fragile and open to change than we think.

How to Make Plastic Ribbon Lampshades Dec 01 2020 A simple 'how to' guide for making plastic ribbon lamp shades for retro lamp bases, where to source materials and step by step instructions for a basic shade. Includes information on Barsony and Kalmar ceramics, many colour illustrations and refurbishment hints for Barsony lamp bases.

Sex Among Allies Feb 21 2020 This study examines and illuminates how the lives of Korean prostitutes in the 1970s served as the invisible underpinnings to US-Korean military policies at the highest level.

The Influence of Sea Power Upon History, 1660-1783 May 18 2022

Base Instincts Feb 27 2023 Investigates the family backgrounds and medical history of serial killers Jeffrey Dahmer and Ted Bundy, and concludes that serial killers may be a product of a genetic predisposition to violence and an abusive environment.

How to Make Melt and Pour Soap Base from Scratch Nov 24 2022 This is the first book published with recipes, methodology and tips on how to make Melt and Pour Soap from Scratch. It is written from the perspective of a Cosmetic Formulator on the production of the popular cosmetic base known as, Melt and Pour Soap. Whether you are a crafter, hobbyist or business owner this book has everything that you need. This book give you guidance on how, as a small home based business, you can follow the regulations, labeling laws and industry standards for selling soap and cosmetics. My entire journey into the cosmetic industry started with Melt and Pour Soap shortly after I discovered aromatherapy. The roots of our business, Essential Wholesale, all started in December of 1998. Over the years we moved from our home kitchenette to a 600 square foot space, to a 2500 square foot building, to a 10,000 square foot space in a bigger building, and from there we have expanded into 30,000 square feet of that same building. In 2011 our business will be moving to an even larger 58,000 square foot building. As our business expanded we

began to focus on natural cosmetics and personal care products. However, I never lost my curiosity and fascination with Melt and Pour Soap. Our relationship with Melt and Pour Soap changed over the years. At first we sold retail customized Melt and Pour Soaps. We then bought and sold the company Critter Soaps. Later we sold thousands of pounds worth of wholesale Melt and Pour Soap base and eventually discontinued selling Melt and Pour Soap because the price kept rising. At the time Melt and Pour Soap was the only cosmetic base we sold that we didn't manufacture ourselves. It simply didn't make sense to wholesale someone else's base when our business model had changed to selling only the bases we manufactured ourselves. It was at this point in our business that I decided it was time to formulate our own Melt and Pour Soap ourselves. It didn't take long to have working formulas, but at that moment we were using up every inch of space in our 30,000 square foot building. We were bursting at the seams and couldn't accommodate the manufacturing and cooling of the Melt and Pour Soap Base in bulk. Our space was so tight we couldn't possibly cool an 8,000 lb batch of Melt and Pour Soap base into multiple 1 lb, 20 lb and 40 lb blocks to sell in bulk. But we got continued requests to manufacture and sell Melt and Pour Soap base. My solution is this book. I decided to share these basic recipes with you to give you the freedom to make your own Melt and Pour base in the quantities that work best for your business. These recipes will teach you the foundational information that you need and give you tips on how to customize your base.

Secure the Base Mar 28 2023 For more than sixty years, Ngugi wa Thiong'o has been writing fearlessly the questions, challenges, histories, and futures of Africans, particularly those of his homeland, Kenya. In his work, which has included plays, novels, and essays, Ngugi narrates the injustice of colonial violence and the dictatorial betrayal of decolonization, the fight for freedom and subsequent incarceration, and the aspiration toward economic equality in the face of gross inequality. With both hope and disappointment, he questions the role of language in both the organization of power structures and the pursuit of autonomy and self-expression. Ngugi's fiction has reached wide acclaim, but his nonfictional work, while equally brilliant, is difficult to find. *Secure the Base* changes this by bringing together for the first time essays spanning nearly three decades. Originating as disparate lectures and texts, this complete volume will remind readers anew of Ngugi's power and importance. Written in a personal and accessible style, the book covers a range of issues, including the role of the intellectual, the place of Asia in Africa, labor and political struggles in an era of rampant capitalism, and the legacies of slavery and prospects for peace. At a time when Africa looms large in our discussions of globalization, *Secure the Base* is mandatory reading.

Globalization and the Nation-state Feb 15 2022 This study opens up new ways of looking at the global world around us. Drawing on contemporary and historical evidence insights are offered into a range of subjects, including the multi-national corporation and the future of the nation state. Aimed at those interested in economic, political and cultural change.

Born on Third Base Jan 26 2023 "With the heart of an agitator and the soul of a storyteller, inequality expert Chuck Collins upends our assumptions about America's deep wealth divide - one that, for the first time in recent history, locks the nation's youth into a future defined by their class and wealth at birth; limits our ability to address crises like climate change; and creates a world that no one, not even the rich, will ultimately want to live in. In [this book], Collins calls for an end to class war, busts the myths that define our views of rich and poor, and offers bold new solutions for bridging the economic divide and re-engaging the wealthy in rebuilding communities for a resilient future."--

The Double Helix Feb 03 2021 The classic personal account of Watson and Crick's groundbreaking discovery of the structure of DNA, now with an introduction by Sylvia Nasar, author of *A Beautiful Mind*. By identifying the structure of DNA, the molecule of life, Francis Crick and James Watson revolutionized biochemistry and won themselves a Nobel Prize. At the time, Watson was only twenty-four, a young scientist hungry to make his mark. His uncompromisingly honest account of the heady days of their thrilling sprint against other world-class researchers to solve one of science's greatest mysteries gives a dazzlingly clear picture of a world of brilliant scientists with great gifts, very human ambitions, and bitter rivalries. With humility unspoiled by false modesty, Watson relates his and Crick's desperate efforts to beat Linus Pauling to the Holy Grail of life sciences, the identification of the basic building block of life. Never has a scientist been so truthful in capturing in words the flavor of his work.

Making Appropriations for Military Construction, Family Housing, and Base Realignment and Closure for the Department of Defense for the Fiscal Year Ending September 30, 2001, and for Other Purposes Jun 19 2022

The World Book Encyclopedia Aug 29 2020 An encyclopedia designed especially to meet the needs of elementary, junior high, and senior high school students.

Area 51 Apr 24 2020 This "compellingly hard-hitting" bestseller from a Pulitzer Prize finalist gives readers the complete untold story of the top-secret military base for the first time (New York Times). It is the most famous military installation in the world. And it doesn't exist. Located a mere seventy-five miles outside of Las Vegas in Nevada's desert, the base has never been acknowledged by the U.S. government — but Area 51 has captivated imaginations for decades. Myths and hypotheses about Area 51 have long abounded, thanks to the intense secrecy enveloping it. Some claim it is home to aliens, underground tunnel systems, and nuclear facilities. Others believe that the lunar landing itself was filmed there. The prevalence of these rumors stems from the fact that no credible insider has ever divulged the truth about his time inside the base. Until now. Annie Jacobsen had exclusive access to nineteen men who served the base proudly and secretly for decades and are now aged 75-92, and unprecedented access to fifty-five additional military and intelligence personnel, scientists, pilots, and engineers linked to the secret base, thirty-two of whom lived and worked there for extended periods. In *Area 51*, Jacobsen shows us what has really gone on in the Nevada desert, from testing nuclear weapons to building super-secret, supersonic jets to pursuing the War on Terror. This is the first book based on interviews with eye witnesses to Area 51 history, which makes it the seminal work on the subject. Filled with formerly classified information that has never been accurately decoded for the public, *Area 51* weaves the mysterious activities of the top-secret base into a gripping narrative, showing that facts are often more fantastic than fiction, especially when the distinction is almost impossible to make.

R for Data Science Sep 29 2020 Learn how to use R to turn raw data into insight, knowledge, and understanding. This book introduces you to R, RStudio, and the tidyverse, a collection of R packages designed to work together to make data science fast, fluent, and fun. Suitable for readers with no previous programming experience, *R for Data Science* is designed to get you doing data science as quickly as possible. Authors Hadley Wickham and Garrett Grolemund guide you through the steps of importing, wrangling, exploring, and modeling your data and communicating the results. You'll get a complete, big-picture understanding of the data science cycle, along with basic tools you need to manage the details. Each section of the book is paired with exercises to help you practice what you've learned along the way. You'll learn how to: Wrangle—transform your datasets into a form convenient for analysis Program—learn powerful R tools for solving data problems with greater clarity and ease Explore—examine your data, generate hypotheses, and quickly test them Model—provide a low-dimensional summary that captures true "signals" in your dataset Communicate—learn R Markdown for integrating prose, code, and results

Base Nation Mar 16 2022 American military bases encircle the globe; from Italy to the Indian Ocean, from Japan to Honduras. The far-reaching story of the perils of the U. S. military bases and what these bases say about America today.

Quotations from Chairman Mao Tsetung Jun 26 2020

Making appropriations for military construction, family housing, and base realignment and closure for the Department of Defense for the fiscal year ending September 30, 2004, and for other purposes Dec 13 2021

Gravel Roads May 26 2020 The purpose of this manual is to provide clear and helpful information for maintaining gravel roads. Very little technical help is available to small agencies that are responsible for managing these roads. Gravel road maintenance has traditionally been "more of an art than a science" and very few formal standards exist. This manual contains guidelines to help answer the questions that arise concerning gravel road maintenance such as: What is enough surface crown? What is too much? What causes corrugation? The information is as nontechnical as possible without sacrificing clear guidelines and instructions on how to do the job right.

Managing Projects with GNU Make Mar 24 2020 The utility simply known as make is one of the most enduring features of both Unix and other operating systems. First invented in the 1970s, make still turns up to this day as the central engine in most programming projects; it even builds

the Linux kernel. In the third edition of the classic *Managing Projects with GNU make*, readers will learn why this utility continues to hold its top position in project build software, despite many younger competitors. The premise behind *make* is simple: after you change source files and want to rebuild your program or other output files, *make* checks timestamps to see what has changed and rebuilds just what you need, without wasting time rebuilding other files. But on top of this simple principle, *make* layers a rich collection of options that lets you manipulate multiple directories, build different versions of programs for different platforms, and customize your builds in other ways. This edition focuses on the GNU version of *make*, which has deservedly become the industry standard. GNU *make* contains powerful extensions that are explored in this book. It is also popular because it is free software and provides a version for almost every platform, including a version for Microsoft Windows as part of the free Cygwin project. *Managing Projects with GNU make, 3rd Edition* provides guidelines on meeting the needs of large, modern projects. Also added are a number of interesting advanced topics such as portability, parallelism, and use with Java. Robert Mecklenburg, author of the third edition, has used *make* for decades with a variety of platforms and languages. In this book he zealously lays forth how to get your builds to be as efficient as possible, reduce maintenance, avoid errors, and thoroughly understand what *make* is doing. Chapters on C++ and Java provide *makefile* entries optimized for projects in those languages. The author even includes a discussion of the *makefile* used to build the book.

Understanding Genetics May 06 2021 The purpose of this manual is to provide an educational genetics resource for individuals, families, and health professionals in the New York - Mid-Atlantic region and increase awareness of specialty care in genetics. The manual begins with a basic introduction to genetics concepts, followed by a description of the different types and applications of genetic tests. It also provides information about diagnosis of genetic disease, family history, newborn screening, and genetic counseling. Resources are included to assist in patient care, patient and professional education, and identification of specialty genetics services within the New York - Mid-Atlantic region. At the end of each section, a list of references is provided for additional information. Appendices can be copied for reference and offered to patients. These take-home resources are critical to helping both providers and patients understand some of the basic concepts and applications of genetics and genomics.

Ethnic Soldiers Dec 21 2019

Maneuvers Sep 22 2022 *Maneuvers* takes readers on a global tour of the sprawling process called "militarization." With her incisive verve and moxie, eminent feminist Cynthia Enloe shows that the people who become militarized are not just the obvious ones—executives and factory floor workers who make fighter planes, land mines, and intercontinental missiles. They are also the employees of food companies, toy companies, clothing companies, film studios, stock brokerages, and advertising agencies. Militarization is never gender-neutral, Enloe claims: It is a personal and political transformation that relies on ideas about femininity and masculinity. Films that equate action with war, condoms that are designed with a camouflage pattern, fashions that celebrate brass buttons and epaulettes, tomato soup that contains pasta shaped like Star Wars weapons—all of these contribute to militaristic values that mold our culture in both war and peace. Presenting new and groundbreaking material that builds on Enloe's acclaimed work in *Does Khaki Become You?* and *Bananas, Beaches, and Bases*, *Maneuvers* takes an international look at the politics of masculinity, nationalism, and globalization. Enloe ranges widely from Japan to Korea, Serbia, Kosovo, Rwanda, Britain, Israel, the United States, and many points in between. She covers a broad variety of subjects: gays in the military, the history of "camp followers," the politics of women who have sexually serviced male soldiers, married life in the military, military nurses, and the recruitment of women into the military. One chapter titled "When Soldiers Rape" explores the many facets of the issue in countries such as Chile, the Philippines, Okinawa, Rwanda, and the United States. Enloe outlines the dilemmas feminists around the globe face in trying to craft theories and strategies that support militarized women, locally and internationally, without unwittingly being militarized themselves. She explores the complicated militarized experiences of women as prostitutes, as rape victims, as mothers, as wives, as nurses, and as feminist activists, and she uncovers the "maneuvers" that military officials and their civilian supporters have made in order to ensure that each of these groups of women feel special and separate.

Any investor serious about making money in the market ought to read it." —Larry Kudlow, host, CNBC's "The Kudlow Report"

Parenting Matters Oct 31 2020 Decades of research have demonstrated that the parent-child dyad and the environment of the family—which includes all primary caregivers—are at the foundation of children's well-being and healthy development. From birth, children are learning and rely on parents and the other caregivers in their lives to protect and care for them. The impact of parents may never be greater than during the earliest years of life, when a child's brain is rapidly developing and when nearly all of her or his experiences are created and shaped by parents and the family environment. Parents help children build and refine their knowledge and skills, charting a trajectory for their health and well-being during childhood and beyond. The experience of parenting also impacts parents themselves. For instance, parenting can enrich and give focus to parents' lives; generate stress or calm; and create any number of emotions, including feelings of happiness, sadness, fulfillment, and anger. Parenting of young children today takes place in the context of significant ongoing developments. These include: a rapidly growing body of science on early childhood, increases in funding for programs and services for families, changing demographics of the U.S. population, and greater diversity of family structure. Additionally, parenting is increasingly being shaped by technology and increased access to information about parenting. *Parenting Matters* identifies parenting knowledge, attitudes, and practices associated with positive developmental outcomes in children ages 0-8; universal/preventive and targeted strategies used in a variety of settings that have been effective with parents of young children and that support the identified knowledge, attitudes, and practices; and barriers to and facilitators for parents' use of practices that lead to healthy child outcomes as well as their participation in effective programs and services. This report makes recommendations directed at an array of stakeholders, for promoting the wide-scale adoption of effective programs and services for parents and on areas that warrant further research to inform policy and practice. It is meant to serve as a roadmap for the future of parenting policy, research, and practice in the United States.

Making Artisan Pizza at Home Jan 02 2021 Over 90 recipes for freshly baked artisan pizzas with delicious, seasonally inspired toppings. Saturday

Pizzas started as a small pop-up restaurant at the famous Ballymaloe Cookery School. The idea was such a success that the pop-up pizzeria has been going for nearly 15 years, and is considered something of an institution within Ireland. In this book the man behind this thriving enterprise shares his secrets for making exceptional pizza in 90 of his favourite recipes. The first chapter Getting Started gives information on equipment, ingredients and cooking in both a domestic oven and a wood burning stove. The second chapter, Dough, gives guidance on making dough by hand or machine and recipes for Sourdough, Spelt and Gluten-Free. Sauces and Extras include delicious condiments such as Red Onion Jam and Hollandaise Butter. The main pizza recipes are then divided into Our Flagship Pizzas, which classics such as Margherita and Pepperoni. Then comes meaty options with Sausage, Cured Meat, and Roast Meat Pizzas.. Seafood Pizzas features delicious, fresh ideas like Smoked Salmon with Capers and Crème fraîche. A long list of Vegetarian Pizzas includes Roast pumpkin with Fennel and Walnut Pesto. There are also chapters on Calzone, Fruit Pizzas, and Dessert Pizzas to finish.

Mapping and Sequencing the Human Genome Jul 08 2021 There is growing enthusiasm in the scientific community about the prospect of mapping and sequencing the human genome, a monumental project that will have far-reaching consequences for medicine, biology, technology, and other fields. But how will such an effort be organized and funded? How will we develop the new technologies that are needed? What new legal, social, and ethical questions will be raised? Mapping and Sequencing the Human Genome is a blueprint for this proposed project. The authors offer a highly readable explanation of the technical aspects of genetic mapping and sequencing, and they recommend specific interim and long-range research goals, organizational strategies, and funding levels. They also outline some of the legal and social questions that might arise and urge their early consideration by policymakers.

The Curious Feminist Dec 25 2022 In this collection of lively essays, Cynthia Enloe makes better sense of globalization and international politics by taking a deep and personal look into the daily realities in a range of women's lives. She proposes a distinctively feminist curiosity that begins with taking women seriously, especially during this era of unprecedented American influence. This means listening carefully, digging deep, challenging assumptions, and welcoming surprises. Listening to women in Asian sneaker factories, Enloe reveals, enables us to bring down to earth the often abstract discussions of the global economy. Paying close attention to Iraqi women's organizing efforts under military occupation exposes the false global promises made by officials. Enloe also turns the beam of her inquiry inward. In a series of four candid interviews and a new set of autobiographical pieces, she reflects on the gradual development of her own feminist curiosity. Describing her wartime suburban girlhood and her years at Berkeley, she maps the everyday obstacles placed on the path to feminist consciousness—and suggests how those obstacles can be identified and overcome. The Curious Feminist shows how taking women seriously also challenges the common assumption that masculinities are trivial factors in today's international affairs. Enloe explores the workings of masculinity inside organizations as diverse as the American military, a Serbian militia, the UN, and Oxfam. A feminist curiosity finds all women worth thinking about, Enloe claims. She suggests that we pay thoughtful attention to women who appear complicit in violence or in the oppression of others, or too cozily wrapped up in their relative privilege to inspire praise or compassion. Enloe's vitality, passion, and incisive wit illuminate each essay. The Curious Feminist is an original and timely invitation to look at global politics in an entirely different way.

Ngarrindjeri Wurruwarrin Jul 28 2020 This finely textured ethnography weaves written texts with the voices of women and men who struggle to protect their sacred sites. It provides a deeper understanding of lives profoundly affected by two centuries of colonization.
