Norsk for utlendinger 1 Warsaw 1920: Lenin's Failed Conquest of Europe

The dramatic and little-known story of how, in the summer of 1920, Lenin came within a hair's breadth of shattering the painstakingly constructed Versailles peace settlement and spreading Bolshevism to western Europe. Fru Ines is a city novel, vividly evoking the sights, sounds, and smells of nineteenth century Constantinople, as Fru Ines, wife of Swedish consul, seeks sexual fulfillment outside her loveless marriage. Two star high school basketball players, one black and one white, experience the justice system differently after committing a crime together and getting caught From the middle of the eighth century to the tenth century, almost all non-literary and non-historical secular Greek books, including such diverse topics as astrology, alchemy, physics, botany and medicine, that were not available throughout the eastern Byzantine Empire and the Near East, were translated into Arabic. Greek Thought, Arabic Culture explores the major social, political and ideological factors that occasioned the unprecedented translation movement from Greek into Arabic in Baghdad, the newly founded capital of the Arab dynasty of the 'Abbasids', during the first two centuries of their rule. Dimitri Gutas draws upon the preceding historical and philological scholarship in Greco-Arabic studies and the study of medieval translations of secular Greek works into Arabic and analyses the social and historical reasons for this phenomenon. Dimitri Gutas provides a stimulating, erudite and well-documented survey of this key movement in the transmission of ancient Greek culture to the Middle Ages. Den falska bilden av Israel dokumenterar vilka vanföreställningar om den judiska staten som är utbredda i Norge. Den ger svar på hur denna bild har skapats genom flera decennier med ensidig och felaktig information från norska medier och skolböcker. Det är särskilt det statliga tv-bolaget NRK och nyhetsbyrån NTB som får sin agenda avslöjad. "Boken Den falska bilden av Israel är som ett

knytnävslag mot medievärldens självbild, utrikesbevakning och multikulturella nonchalans. Alla, som tar sig tid att läsa hela verket, kommer att bli skakade av felen, ensidigheterna och den direkt pro-arabiska propagandan. Inte slumpartade och urskuldande enstaka misstag gjorda under tidspress, utan systematisk desinformation och hets mot Israel i reportage efter reportage, år efter år. Kritiken är noggrant dokumenterad och fundamental och borde vara obligatorisk läsning vid alla fakultet och skolor som undervisar i journalistik och kommunikation." Alf R. Jacobsen, författare och journalist, i bokens förord. "I en tid präglad av diskussioner om fake news, alternativ media, mediakritik och där de traditionella nyhetsmedierna blir allt mer ifrågasatta ligger Conrad Myrlands skrift precis rätt i tiden. Israels öppenhet är ofta ett tveeggat svärd, då man utsätts för en medial bevakning som ofta kännetecknas av dubbla måttstockar. Myrlands bok är ett självklart bidrag till alla de som är intresserade av hur medier efterföljer sitt uppdrag i asymmetriska konfliktzoner." Martin Blecher, statsvetare

*Discover the concepts, architectures, components, tools, and techniques needed to design millimeter-wave circuits for current and emerging wireless system applications. Focusing on applications in 5G, connectivity, radar, and more, leading experts in radio frequency integrated circuit (RFIC) design provide a comprehensive treatment of cutting-edge physical-layer technologies for radio frequency (RF) transceivers - specifically RF, analog, mixed-signal, and digital circuits and architectures. The full design chain is covered, from system design requirements through to building blocks, transceivers, and process technology. Gain insight into the key novelties of 5G through authoritative chapters on massive MIMO and phased arrays, and learn about the very latest technology developments, such as FinFET logic process technology for RF and millimeter-wave applications. This is an essential reading and an excellent reference for high-frequency circuit designers in both academia and industry. Visit any school in the United States and chances are that you will find at least one of the social studies teachers showing a film about history. Along with the textbook, movies are one of the most prominent teaching aids in the history classroom. Yet, when middle and high school history teachers look for models of the effective use of motion pictures in history classrooms, the cupboard is surprisingly bare. Teaching History with Film provides a fresh, engaging, and clear overview of teaching with film to effectively enhance social studies instruction. Using cases of experienced teachers to illustrate accomplished history teaching through the use of movies, this text provides pre- and in-service teachers with ideas for implementing film-based lessons in their own classrooms and offers a deeper understanding of the thorny issues involved in using film to teach history. Each section of the book focuses on how teachers can effectively support the development of students' historical film literacy through topics such as using film to develop historical empathy, to develop interpretive skills, and to explore controversial issues. By developing the skills students need to think critically about the past or what they think they know about history, the lessons in this book illustrate how to harness the pedagogical power of film to provide the tools necessary for rigorous inquiry and democratic citizenship. Special features include: "Reflection on the Case," following each chapter, analyzing and discussing the strengths*

and limitations of the teacher's approach as well as providing strategies for using and choosing films specific to the educational outcome Sample unit outlines, descriptions of class texts and films, worksheets, essay questions, viewer guides, and exercises for the classroom throughout Discussion of the practical considerations facing classroom teachers, including juggling time restraints, issues of parental permission, and meeting standards The Sturmgewehr is the mother of all assault rifles and a major step in the development of the modern firearm. It combined low production costs with special ammunition, resulting in a cheap but a very effective full-automatic rifle. Fortunately, development and adoption was delayed by Hitler's objections, thus limiting the amount of guns that actually reached the front. The formation of states in early modern Europe has long been an important topic for historical analysis. Traditionally, the political and military struggles of kings and rulers were the favoured object of study for academic historians. This book highlights new historical research from Europe's northern frontier, bringing 'the people' back into the discussion of state politics, presenting alternative views of political and social relations in the Nordic countries before industrialisation. The early modern period was a time that witnessed initiatives from people from many groups formally excluded from political influence, operating outside the structures of central government, and this book returns to the subject of contentious politics and state building from below. Originally published in 1886, 'Albertine' tells the story of an underprivileged seamstress in Norway's capital, Christiania. It is about the character's hopes and dreams, her relationship with a police officer and the unfortunate circumstances that force her to turn to prostitution. Due to the nature of its content, the book was confiscated shortly after publication. Christian Krohg (1852-1925) was a Norwegian painter and writer, and painted several works based on the 'Albertine' story. This classic and rare text is being republished in a modern and affordable format, complete with a new, specially written biography and featuring the original text and artwork. Ein Traumziel, ein Land, in das man eine Reise unternimmt, sollte man nicht nur besichtigen und vielleicht bestaunen, um danach mit vielen Fotos und Erinnerungen wieder ins Alltagsleben zurück zu kehren. Ich habe bei meinen Reisen die Erfahrung gemacht, dass die Erlebnisse und Begegnungen in der Fremde intensiver und lohnender wurden, wenn ich ein wenig über das Land wusste, über die Menschen, ihre Gewohnheiten und aktuellen Themen. Meine Freude darüber gilt vor allem meinem Traumziel Norwegen. Darum verstehe ich mich hier als Vermittlerin von Themen, die im Allgemeinen nicht so bekannt sind; als Erzählerin von Geschichten aus Vergangenheit und Gegenwart; als Berichterstatteerin von Informationen, die den Blick auf Land und Leute schärfen. The Age of Genius explores the eventful intertwining of outward event and inner intellectual life to tell, in all its richness and depth, the story of the 17th century in Europe. It was a time of creativity unparalleled in history before or since, from science to the arts, from philosophy to politics. Acclaimed philosopher and historian A.C. Grayling points to three primary factors that led to the rise of vernacular (popular) languages in philosophy, theology, science, and literature; the rise of the individual as a general and not merely an aristocratic type; and the invention and application of instruments and measurement in the study of the

natural world. Grayling vividly reconstructs this unprecedented era and breathes new life into the major figures of the seventeenth century intelligentsia who span literature, music, science, art, and philosophy--Shakespeare, Monteverdi, Galileo, Rembrandt, Locke, Newton, Descartes, Vermeer, Hobbes, Milton, and Cervantes, among many more. During this century, a fundamentally new way of perceiving the world emerged as reason rose to prominence over tradition, and the rights of the individual took center stage in philosophy and politics, a paradigmatic shift that would define Western thought for centuries to come. Nothing is so boundless as the sea, nothing so patient. On its broad back it bears, like a good-natured elephant, the tiny mannikins which tread the earth; and in its vast cool depths it has place for all mortal woes. It is not true that the sea is faithless, for it has never promised anything; without claim, without obligation, free, pure, and genuine beats the mighty heart, the last sound one in an ailing world. And while the mannikins strain their eyes over it, the sea sings its old song. Many understand it scarce at all, but never two understand it in the same manner, for the sea has a distinct word for each one that sets himself face to face with it

**Abstract: The European arena of lifelong learning offers rich country-specific portfolios of historical trajectories, policy frameworks and practical evidence of adult and continuing education. This book provides an introduction to the case of Norway and outlines the key features of the Norwegian system alongside issues such as political and legal agendas, schemes of participation, provision and financing or trends in professionalization, research areas and transnational linkages. Through the lens of adult and continuing education, the author invites researchers, practitioners, students and persons interested in international-comparative perspectives to a tour d'horizon of the Norwegian lifelong learning landscape**

**Kan du tro på lærebøkene? Hva sier de om kirken, om kristne, om historien? Hevdet kirken i middelalderen at jorden var flat? Ble de som hadde spørsmål om naturen, henvist til liturgien? Kom opplysningstiden fordi folk sluttet å tro på Gud? Denne boken kaster lys over rare påstander elever kan møte i skolen. Hva kommer slike feil av? Hvorfor tror vi på dem? **Continuing the tradition of the best selling textbooks, this first edition "Engineering Thermodynamics" is a comprehensive reference to the broad spectrum of thermodynamics, encapsulating the theoretical and practical aspects of the field. The author addresses a myriad of topics, covering both traditional and innovative approaches. Additionally, the book includes numerous tables**

**The two volumes of the second edition of the International Handbook of Educational Change comprise a totally new, and updated collection of the most critical and cutting-edge ideas in educational change. Written by the most influential thinkers in the field, these volumes cover educational change at both the theoretical and practical levels. The updated handbook remains connected to the classical concerns of the field, such as educational innovation, reform, and change management, and also offers new insights into educational change that have been brought about by social**

change and shifting contexts of educational reform. Like the first best selling Handbook, this one will also undoubtedly become an essential resource for people involved in all spheres of education, from classroom teachers, teacher leaders and administrators to educational researchers, curriculum developers, and university professors. No other work provides such a wide-ranging and comprehensive examination of the field of educational change. This book explores the origins, development, combat use and lasting influence of Nazi Germany's automatic rifles, focusing on the Gew 41(W), Gew 43/Kar 43, FG 42 and MP 43/StG 44. The Blitzkrieg campaigns of 1939-40 convinced many observers that most infantry combat took place at closer ranges than the 750-1,000m. From 1941 Germany's arms designers took note and produced a new series of infantry firearms. This study not only provides a detailed technical description of each weapon, but also explores how the firearms performed on the battlefields of World War II. The combat takes us from the FG 42 in the hands of Fallschirmjäger at Monte Cassino through to StG 44s being used by Waffen-SS soldiers on both the Eastern and Western Fronts. Postwar service is also studied, such as the Gew 43's adoption by the Czech Army and the StG 44's use by the Viet Cong in the Vietnam War. Setting each firearm in its tactical and historical context, and employing striking photographs and full-colour artwork, firearms expert Chris McNab sets out the absorbing story of this distinctive and influential series of weapons. These essays reexamine European forts in West Africa as hubs where different peoples interacted, negotiated and transformed each other socially, politically, culturally, and economically. This collection brings together scholars of history, archaeology, cultural studies, and others to present a nuanced image of fortifications, showing that over time the functions and impacts of the buildings changed as the motives, missions, allegiances, and power dynamics in the region also changed. Focusing on the fortifications of Ghana, the authors discuss how these structures may be interpreted as connecting Ghanaian and West African histories to a multitude of global histories. They also enable greater understanding of the fortifications' contemporary use as heritage sites, where the Afro-European experience is narrated through guided tours and museums.

Eingebettete Systeme werden aufgrund ihrer Spezialisiertheit zunehmend aus interagierenden Hardware- und Software-Komponenten realisiert. Dies macht ein ganzheitliches Verständnis der Verifikationsproblematik erforderlich. Das Lehrbuch dient als Einführung in die systematische Verifikation eingebetteter Systeme, sowohl bei spezialisierten Verfahren zur Hardware- und Software-Verifikation als auch bei der Verifikation der Schnittstellen. Der Band dient als Nachschlagewerk für Entwickler und als Begleiter im Informatik- und Elektrotechnik-Studium. Provides practical examples of circuit design and analysis using PSpice, MATLAB, and the Smith Chart This book presents the three technologies used to deal with electronic circuits: MATLAB, PSpice, and Smith chart. It gives students, researchers, and practicing engineers the necessary design and modelling tools for validating electronic design concepts involving bipolar junction transistors (BJTs), field-effect transistors (FET), OP Amp circuits, and analog filters. Electronic Circuits with MATLAB®, PSpice®, and Smith Chart presents analytical solutions with the results of MATLAB analysis and PSpice simulation. This gives the reader information about the state of the art and

confidence in the legitimacy of the solution, as long as the solutions obtained by using the two software tools agree with each other. For representative examples of impedance matching and filter design, the solution using MATLAB and Smith chart (Smith V4.1) are presented for comparison and crosscheck. This approach is expected to give the reader confidence in, and a deeper understanding of, the solution. In addition, this text: Increases the reader's understanding of the underlying processes and related equations for the design and analysis of circuits Provides a stepping stone to RF (radio frequency) circuit design by demonstrating how MATLAB can be used for the design and implementation of microstrip filters Features two chapters dedicated to the application of Smith charts and two-port network theory Electronic Circuits with MATLAB®, PSpice®, and Smith Chart will be of great benefit to practicing engineers and graduate students interested in circuit theory and RF circuits. In these pages, acclaimed historian David Crane gives us an astonishing, intimate snapshot of the people and places surrounding the battle that changed the course of world history. Switching perspectives between Britain and Belgium, prison and palace, poet and pauper, husband and wife, *Went the Day Well?* offers a highly original view of Waterloo, showing how the battle was not only a military landmark, but also a cultural watershed that drew the line between the rural, reactionary age of the past and the urban, innovative era to come. Lyrically rendered in Crane's signature prose style, this essential account freeze-frames the ordinary men and women of 1815 who went about their business, attended lectures, worked in fields and factories—all on the cusp of a new, unforeseeable age. This book documents and analyses the involvement of Norway in the liberation struggle in Southern Africa. Apart from focussing on the formulation of official policies and the extensive cooperation with the liberation movements in the field of humanitarian assistance, mainly based on the Ministry of Foreign Affairs records, the study highlights the popular involvement and commitment to the struggle. Separate chapters are concerned with the churches, trade unions and solidarity movements, such as the Norwegian Council for Southern Africa and the Namibia Committee. The book also includes a case study on the battle for sanctions. The Study forms part of the Nordic Africa Institute's research and documentation project -National Liberation in Southern Africa: The Role of the Nordic Countries-.
