Written as a series of bibliographic essays, the guide opens with a description of major reference sources encompassing many cultures, as well as those tracing particular themes (such as that of the creation) across cultures. The other bibliographic essays discuss sources for studying prehistoric mythologies, the mythologies of West Asian peoples (Mesopotamian, Biblical, Islamic, and others), South and East Asian mythologies, European mythologies, American Indian

mythologies (North, Central, and South American), African mythologies, and the mythologies of the Pacific and Australia. Scientific information is increasingly being communicated at both national and international scientific conferences in the form of poster presentations. A recent international conference, for example, which involved nearly 500 delegates from over 50 different countries, included information presented in 331 posters. Recent experience has shown, however, that the presentational standard of such posters, even at the international level, varies immensely. Individuals presenting well-designed, eye-catching, and engaging posters are at a distinct advantage in promoting their scientific information. In doing so, they also promote themselves as credible scientists, as well as promoting the reputation of their establishments and countries of origin. However, producing a poster of high quality requires considerable planning and the acquisition of specific presentational skills. This book provides detailed practical guidance on all aspects of presenting scientific information in the form of posters. It is assumed that the presenter has access, either at home, at work, or through libraries, to a computer or word processor, a color printer, and photocopiers. The book is intended to help scientists to gain poster presentational skills in a manner that enables adoption of an individualistic style of presenting information in a credible fashion. The book has relevance internationally and is primarily targeted at research workers, including postgraduate students and all scientific professionals who are required to present visual communication of scientific information. This ambitious undertaking is designed to acquaint students, teachers, and researchers with reference sources in any branch of English studies, which Marcuse defines as "all those subjects and lines of critical and scholarly inquiry presently pursued by members of university departments of English language and literature." Within each of 24 major sections, Marcuse lists and annotates bibliographies, guides, reviews of research, encyclopedias, dictionaries, journals, and reference histories. The annotations and various indexes are models of clarity and usefulness, and cross references are liberally supplied where appropriate. Although cost-conscious librarians will probably consider the several other excellent literary bibliographies in print, such as James L. Harner's *Literary Research Guide* (Modern Language Assn. of America, 1989), larger academic libraries will want Marcuse's volume.-- Jack Bales, Mary Washington Coll. Lib., Fredericksburg, Va. -Library Journal. A

guide to the pantheon of Greek and Roman gods and the myths weaved around them. Split into two parts, the first part giving biographies of the gods, the second part the famous legends. As part of the Works Progress Administration during the Depression, two women interviewers, Lou Sage Batchen and Annette Hesch Thorp, gathered women's stories or cuentos from many native ancianas to glean vivid details of a way of life now long disappeared. With fantastical narratives, home-brewing instructions, and original craft cocktail recipes, Mead is the ultimate exploration of the resurgent alcoholic beverage that is nearly as old as time itself. Beloved by figures as diverse as Queen Elizabeth and Thor, the Vikings and the Greek gods, mead is one of history's most storied beverages. But this mixture of fermented honey isn't just a relic of bygone eras -- it's experiencing a cultural renaissance, taking pride of place in trendy cocktail bars and craft breweries across the country. Equal parts quirky historical narrative, DIY manual, and cocktail guide, Mead is a spirited look at the drink that's been with us even longer than wine. Mead gives readers a fascinating introduction to the rich story of this beloved beverage -- from its humble beginnings to its newfound popularity, along with its vital importance in seven historic kingdoms: Greece, Rome, the Vikings, Poland, Ethiopia, England, and Russia. Pairing a quirky, historical narrative with real practical advice, beverage expert Fred Minnick guides readers through making 25 different types of mead, as well as more than 50 cocktails, with recipes from some of the country's most sought-after mixologists. A collection of modern-day urban myths and folklore explores questions relating to famous figures, government conspiracies, paranoia, revenge, chain letters, and humiliating experiences. For a variety of political, climatic, ecological, security-related and other reasons, the Russian summer resort of Sochi by the Black Sea would seem a most unlikely candidate for the Olympic Winter Games. Despite this, the Games will be held there in February 2014, and the Russian leaders regard the Games as a highly prestigious project underlining Russia's return to a status of great power in the contemporary world. This book conducts a thorough inventory of the contexts, characteristics and challenges facing the Sochi Games. It deals with the problems from Russian, Georgian, Abkhazian and Circassian perspectives and makes in-depth analyses of profound challenges related to matters such as identity, security, and ethnic relations. The book brings together an international group of eminent scholars representing different disciplinary perspectives, including political science, sports science, ethics, ethnology, and Caucasian studies. A guide to the pantheon of Greek and Roman gods and the myths weaved around them. Split into two parts, the first part giving biographies of the gods, the second part the famous legends. These myths and legends are what ancient people lived and died by and have inspired the greatest works of art and literature in the world. A person does not need to be a student of the classics to benefit from and enjoy this thoughtful work. It is not simply a repeat of the old legends but a handbook to understanding ancient Greek and Roman life with the intent of enabling us to see their gods and goddesses as they did. 585 new titles, most published from 1980 to 1989, and 213 new editions and supplement volumes of titles cited in the second edition. Appendix and extensive indexes. Recommended for undergraduate bibliographic collections. --ARBA Is your child getting lost in the system, becoming bored, losing his or her natural eagerness to learn? If so, it may be time to take charge of your child's education—by doing it yourself. *The Well-Trained Mind* will instruct you, step by step, on how to give your child an academically rigorous, comprehensive education from preschool through high school—one that will train him or her to read, to think, to understand, to be well-rounded and curious about learning. Veteran home educators Susan Wise Bauer and Jessie Wise outline the classical pattern of education called the trivium, which organizes learning around the maturing

capacity of the child's mind and comprises three stages: the elementary school "grammar stage," when the building blocks of information are absorbed through memorization and rules; the middle school "logic stage," in which the student begins to think more analytically; and the high-school "rhetoric stage," where the student learns to write and speak with force and originality. Using this theory as your model, you'll be able to instruct your child—whether full-time or as a supplement to classroom education—in all levels of reading, writing, history, geography, mathematics, science, foreign languages, rhetoric, logic, art, and music, regardless of your own aptitude in those subjects. Thousands of parents and teachers have already used the detailed book lists and methods described in *The Well-Trained Mind* to create a truly superior education for the children in their care. This extensively revised fourth edition contains completely updated curricula and book lists, links to an entirely new set of online resources, new material on teaching children with learning challenges, cutting-edge math and sciences recommendations, answers to common questions about home education, and advice on practical matters such as standardized testing, working with your local school board, designing a high-school program, preparing transcripts, and applying to colleges. You do have control over what and how your child learns. *The Well-Trained Mind* will give you the tools you'll need to teach your child with confidence and success.
